Full Spectrum Extraction

The idea of full spectrum extraction is simple - preserve as much of the original complexion of the cannabis plant as possible. This includes cannabinoids, terpenes, flavonoid, and everything in between. This makes for a flower-like character, and a sustained entourage effect.

Hydrocarbon Free CO₂ Extraction

Supercritical CO₂ takes the place of Butane, Propane, or Ethanol as the extraction agent, making for a product with no residual hydrocarbon solvents.

Robust Color = Robust Flavor

Cannabis is full of colorful plant matter. Refined captures all this natural cannabis color and showcases it with a hearty oil color that speaks to its rich cannabis flavor and full spectrum personality.

Choose your Mood with ease with cartridge strain stickers

Never deal with a mystery cartridge again! Simply peel off the strain sticker from the bottom right on the front of the cartridge, and stick it your cartridge so you can always choose your mood and strain with confidence.

Tried and True. Since it's launch in 2017, Leafwerx Refined has been the vapor staple for thousands of customers all across Washington. Its following has been built for several reasons.

Some customers tell us they like that its extracted from CO₂ instead of BHO, PHO, or Ethanol extraction. Others tell us they like the Leafwerx flower personality that comes through, with strains like Nine Pound Hammer #6 maintaining their characteristics. Many tell us they like how easy, accesible, and consistent Refined has always been and always will be.

We like the big, robust character of Refined, which reminds us of a well packed bowl of flower, a thick porter, or a dark roast cup of coffee.
